Setting Integration Tool Manual

Rongta Technology (Xiamen) Group Co., Ltd.

1. Manual Information

This Manual provides information on the use of the function selection software, the modification of operating conditions, etc. of this product.

2. Instruction

The printer needs to be ready before using the setting tool:

a. Confirm that the printer is connected to the power supply and is turned off;

b. Insert the communication cable into the corresponding communication interface of the printer;

c. Confirm that a paper roll has been loaded;

d. Turn on the printer;

2.1 Connection Test

The operation display is as follows:

Communication with pri	nter	
 USB 		
O Port:	COM1:	▼ Config Port
O Printer Driver:	Fax	
ist of Printers		
400		Add Printer
410 420		Modify Printer
500		Delete Printer
		Connection Test
		Show Printer Info

According to the model interface, select U or other port or driver port to connect the printer, and click [Connection Test]. If the following figure is displayed successfully, it means that the printer has been connected. (if connection fails, please reinstall the communication cable and check the communication settings.)

2.4.5 User setting

Switch to the user setting screen to set buzzer on/off or restore the default settings of the printer.

Printer Parameter Setting	Location Test PRN Pri	t User Def Ether	net Serial \	Vifi Bli
Beep:	Disable 💌	Set		
Command type:	Label Commar 💌	Set		
Paper width:	64mm 👻	Set		
	Restore factory settings			

The function details are as follows

Submenu	Description	Parameter description (parameter order is consistent with	Default
Веер	Change the sound of	ON、OFF, 0ON,	0
Restore factory setting	Reset printer back to the factory default settings		None

2.4.6 Ethernet

Switch to Ethernet interface to set Ethernet parameters

- 1. Set the IP address of the printer, change it to "192.168.1.87", and set the communication port
- 2. Set the printer's subnet mask and change it to "255.255.255.0"
- 3. Set the printer's gateway as "192.168.1.1"
- 4. Set the printer's DHCP function. The printer's DHCP is disabled by default. If necessary, it can be enabled to make the printer automatically obtain the address
- 5. Set the Mac address and set the network transmission rate.

IP	C DHCP	
. IF		
IP:	192 . 168 . 1 . 87 Port: 9100	Set
Sub Mask:	255 . 255 . 255 . 0	
GateWay:	192 . 168 . 1 . 1	
DHCP:	Disable	*
	Set	
MAC:	00 00 00 00 00	Set

Note : Before setting the web address, if the printer is connected with one of following two methods: "One" uses the "Internet port", "Two" the IP address in the print driver mode. After changing the IP, the printer's IP address is changed. At this point, the printer is disconnected from the tool, and the IP address of the tool needs to be reset before connecting the printer. Other connection methods are not affected.

2.4.7 WIFI

Printer parameter setting instruction

1.Open the setting tool " PrinterTool ".

2.According to the instruction manual of this setting tool, first make. sure that the printer is connected.

3.Open the setting tool and select "WiFi".

4.Input the SSID (WiFi name) to which the printer is connected, and the corresponding mode.

5.Enter the WiFi encryption type and the WiFi password, as shown in the figure. For example, add WiFi rdhz, with the password encryption type of WPA-PSK, enter the WiFi password, and click "Set".

6.After clicking "Set", the printer will print the set WiFi parameters. Please print a self-test page and compare the printed WiFi parameters with those of the router. If matched, please wait patiently and the printer will connect to the WiFi within 1 minute. If not matched, please reset and repeat the above steps.

Note: The factory default IP address of the printer is 192.168.1.87. If the printer's IP address and the wireless router's IP address are not on the same network segment, you need to set the printer's IP address to ensure the two addresses are on the same network segment.

2.4.9 Bluetooth Settings

If the printer has Bluetooth function, you can set the Bluetooth parameters. 1.First press and hold the FEED button of the printer, and then turn on the

printer to print the self-test page。From the self-test page, find out the Bluetooth pairing name and password of the printer.

2. The Bluetooth pairing name and password can be changed if necessary. At this time, the "Bluetooth Settings" function in the integrated setting tool needs to be used, as shown in the figure below.

3.Enter the new "Device Name" and "Pin" for the printer Bluetooth, and click "Set". After the printer is restarted, the settings are changed successfully.

4.Power on the main device and search for the external Bluetooth device. 5.Find the Bluetooth printer just changed and enter the corresponding password to complete the pairing. When pairing, the printer must be on.

Note: During pairing, please do not turn on multiple printers at the same time; otherwise, you may not be able to judge which printer was successfully paired.
